

Pure EC

Type and composition:

Fungicide contains 25 % w/v Bupirimate in the form Emulsifiable concentrate (EC).

Mode of Action:

Systemic fungicide with protective and curative action.

Advantage and properties:

Pure: Systemic fungicide with protective and curative action. Absorbed by the leaves, with translocation in the xylem and translaminar action. Due to its high volatility, bupirimate gives effective control when complete leaf cover is difficult. Act by inhibiting sporulation.

Pure: use to control powdery mildew on wide range of agricultural crop.

Pure: Compatible with other pesticide, but when used on cucumber don't mix with other pesticides and prefer work mini experience before mix.

Pure: Non-phytotoxic to most plant species when used as recommended.

Pure: Repeated exposure may cause skin dryness or cracking., toxic to birds, flammable, May be fatal if swallowed and enters airways , May cause respiratory irritation

Application rate:

Crop	Disease	Rate of application /20 liter water	PHI
Apple, Pears	powdery mildew	12 ml	14 days
Plum		8-12 ml	14 days
strawberry		10-14 ml	3 days
