

Pure

Type and composition:

Fungicide contains 25 % w/v Bupirimate in the form Emulsifiable concentrate (EC).

Mode of Action:

Systemic fungicide with protective and curative action.

Advantage and properties:

Pure: Systemic fungicide with protective and curative action. Absorbed by the leaves, with translocation in the xylem and translaminar action .due to its high volatility, bupirimate gives effective control when complete leaf cover is difficult .act by inhibiting sporulation.

Pure: use to control powdery mildew on wide range of agricultural crop.

Pure: Compatible with other pesticide, but when used on cucumber don't mix with other pesticides and prefer work mini experience before mix.

Pure Non-phytotoxic to most plant species when used as recommended.

Pure: May be fatal if swallowed and enters airways, flammable, may cause an allergic skin reaction, very toxic to aquatic organisms.

Application rate:

Crop	Disease	Rate of application /20 liter water	PHI	Interval between applications
Apple, Pears	powdery mildew	12 ml	14 Days	10-14 Days -
Plum		8-12 ml	14 Days	
strawberry		10-14 ml	3 Days	
Cucumber, squash, melon, water melon, pumpkin		8-12 ml	3 Day	
Roses		20-30 ml	-----
