

Metro core 70% WP

Type and composition:

Herbicide Containing Metribuzin 70 % w/w in form Wettable powder (WP) .

Mode of Action:

Selective systemic herbicide, absorbed predominantly by the roots, but also by the leaves, with translocation acropetally in the xylem.

Advantage and properties:

Metro core 70 WP : Selective systemic herbicide, absorbed predominantly by the roots, but also by the leaves, with translocation acropetally in the xylem.

Metro core 70 WP: Pre- and post-emergence control of many grasses and broad-leaved weeds.

Metro core 70 WP: Has long residual effect to control annual grasses.

Metro core 70 WP: Use on potato and tomato field .

Metro core 70 WP: Compatible with most other herbicides, except in highly concentrated mixtures.

Metro core 70 WP: harmful if swallowed, toxic if inhaled, very toxic to aquatic life.

Application rate:

Crops	Type of grasses	Time of application	Rate of application	Note	PHI
Potato	To control grasses and Broad-	Preemergence	10-15 g for light soil 20 g for other type of soil	--	30 days
		Postemergence	10-15 gm		
Tomato		Preplant	10 gm for light soil 15 gm for other type of soil	Use only in open fields; do not use in tunnels or greenhouses.	

	leaved weeds.	Postplant	10 gm	Use only when weeds emerge after transplanting.	30 days
		Postemergence	10 gm	Use when the plants have 4–6 leaves.
