

TECHNICAL DATASHEET

MICROMIX COMPLEX (WG)

Trace elements complex chelated by EDTA+ EDDHSA+HGA in form of micro-granules fully water soluble.

Prevents and corrects imbalances caused by deficiencies of micronutrients in all crops.

APPERANCE: black reddish

Composition:

Boron (B) 0.7%

Copper (Cu) EDTA 0 ,3%

Iron(Fe)

EDTA+EDDHSA+HGA 7,5%

Manganese (Mn) EDTA 3,3%

Molybdenum (Mo) 0.1%

Zinc (Zn) EDTA 0,6%

Doses and method of use:

1.FERTIGATION:

| CROP | DOSE | APPLICATION TIME |
|------------------------------------|-------------------------------------|--|
| HORTICULTURAL CROPS AND ORNAMENTAL | 2-3 kg / hectare | Start from beginning of vegetative activity. 2-4 times each 2 weeks |
| FRUIT TREES | 2-3 kg /ha | Start at budding stage then once application per month till harvesting |
| SUBSTRATE APPLICATION | 300g/1000 L | Make it homogenous with substrate |
| HYDROPONIC | 3.5-5.5 g/100 L of irrigation water | Every week |

2. FOLIAR APPICATION:

750 gm -1000 gm /1000 l for all crops.

Note: avoid high temperature during spray application

Compatibility:

MICRO-MIX COMPLEX (WG) is compatible with the most of the fertilizers and plant protection

Products usually used in agriculture. In case of doubt, we recommend to make a previous test.

Packing size available: 1, 5 and 10 kg in aluminum bag and 20 kg in cardbox.
