

TECHNICAL DATASHEET

COLOR-FRUIT (SL)

It is a liquid concentrate based on POTASSIUM in the form of organic complex, along with magnesium, chelated trace elements, specific amino acids and natural color elicitors. Suitable for favoring the development, maturity and color of fruits in all crops, as it also improves flavor and fruit consistency.

APPEARANCE: brown liquid

Composition:

Potassium oxide (K₂O): 20%

Magnesium oxide (MgO): 2%

Iron (Fe) EDTA :0.05%

Manganese (Mn) EDTA :0.05%

Zinc (Zn) EDTA :0.05%

Specific free amino acids: 2%

Natural color elicitors: 2%

Doses and methods of use:

Crops	Application
all crops	4-5 liter / hectare

Recommendation:

It is highly recommended to start the first application when the fruit starts to change, and if needed re-do the application after 10 days from that point.
