

TECHNICAL DATASHEET

VITALPLANT (SL)

It is a plant anti-stress liquid physioactivator, obtained through exclusive processes that allow maintaining all its fully active components, in order to stimulate and activate the physiological processes in all plant stages. VITALPLANT improves photosynthetic activity, vegetative growth, root development, flowering, fruit set, size, color and flavor. As well as the absorption of nutrients, etc.

APPEARANCE: brown liquid

Composition:

Phosphoric anhydride (P2O5)	20%
Molybdenum (Mo)	1%
AATC (Synthetic amino acids)	1%
TCA (Synthetic Amino acids)	1%
Specific free amino acids	3.5%
Algae (Ascophyllum Nodosum)	3.5%

Compatibility:

VITALPLANT (SL) is compatible with the most of the fertilizers and plant protection products.

Keep away from oxidising agents and high alkaline or acidic materials, to avoid an exothermic reaction. In case of doubt, we recommend to carry out a test before application.

Doses and method of use:

Crops	dose
VEGETABLES	From 20 to 30 ml/20L water. From 3 to 4 litres of product / ha. Carry out from 2 to 4 treatments according crop needs.
Fruit trees	From 20 to 30 ml/20L water. From 4 to 5 litres of product / ha Start treatment from petals fall and during fruit development.
CITRUS	From 20 to 30 ml/20L water. From 4 to 5 litres of product / ha Start treatments after natural fruit fall. Continue during fattening until fruit colour turning.

Packing size available: 1,5 and 20 litres.

Heavy metals:

ARSENIC	CADMIUM	COBALT	NICKEL	LEAD	MERCURY	CHROME
2.0	5.0	1.8	5.0	1.0	0.4	0.7
